EXPERIENCE

H&H Technology

Full Stack developer

Feb 2023 -Apr 2023

Remote

- Developed a responsive and user-friendly frontend for the e-commerce website using ReactJ.
- Integrated Stripe payment gateway for secure and easy online payments.
- Created and configured the backend using Strapi CMS, enabling easy content management by the admins.

PROJECTS

E-commerce Website for Clothing Store | *React Js, Strapi, Stripe*

- Implemented secure payment integration using Stripe API to ensure seamless and safe transactions.
- Designed and developed a user-friendly dashboard for the site administrators to manage products, orders, and customers easily.
- Utilized the benefits of caching and optimized the site's performance to reduce loading time and improve user experience.

Banking app UI development | *HTML, CSS, JavaScript*

Developed a functional banking app user interface using HTML, CSS, and JavaScript. Implemented basic features such as money transfer and transaction history for a predefined set of users. Utilized web technologies to create an intuitive and user-friendly interface.

AquaBill - A Water Billing Application | *React, Python, PostgreSQL*

AquaBill is a water billing application designed to manage water billing for a single user. The application allows the user to log in as an admin, enter water billing details such as sno or bill number, customer name, number of water cans, and amount paid or unpaid for the can. The details entered by the user are then stored in a PostgreSQL database. The application also has a feature to view the billing details in a table, which can be edited if necessary. Additionally, there is a "print bill" button in each row of the table.

TECHNICAL SKILLS

Languages : HTML,CSS,JavaScript,Python

Framework : React Js

Developer Tools : Git, Strapi, MongoDB, PostgreSQL, MySQL

CERTIFICATES
